**Note:**

**Unit-2 :Office Suite**

This chapter has used Microsoft Office as an example for word processing, calculation, presentation and data storage which are core applications handled by computer system.

There are freeware / open source software available with suitable features of office. Few open source office suite are as follows:

1. Kingsoft office suite: It has software WPS office suite free 2014 with
  - Writer – is used as word processor
  - Spreadsheets – used for calculation purpose
  - Presentation - used for preparing presentation.
2. Koffice suite : It has
  - Kword – is used for word processor
  - Kcells - used for calculation purpose
  - Showcase - used for preparing presentation.

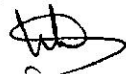

3. Apache Open office 3.4.1 : It includes
- Writer – is used for word processor
  - Calc - used for calculation purpose
  - Impress - used for preparing presentation.
  - Base – used as a database tool.

All the above mentioned office suite can be used on windows platform.
